REORGANIZATION OF THE CAMPS COMMITTEE
INTO THE
MONTANA MANPOWER PLANNING ADVISORY COUNCIL

INTRODUCTION

The increasing number of federal manpower programs and more federal, regional, state and local involvement with the delivery of services, has created a need for new organizational approaches to program coordination. To provide this coordination, the Montana Manpower Planning Advisory Council was established by Executive Letter of the Governor of Montana.

The Montana Manpower Planning Advisory Council will advise the Governor of Montana and the Regional Manpower Coordinating Committee of the need for manpower services in Montana. The Council will establish locally conceived priorities and services required to address these needs. In addition, the Council will develop a comprehensive manpower plan for the state that identifies manpower needs, establishes priorities and makes recommendations to the Governor concerning the delivery of manpower services and program funding.

The plan shall define target areas and identify goals in terms of individuals needing services; employers needing employable workers; and a comprehensive design for the provision of services that will insure a high level of success in moving people into meaningful, steady employment in the shortest, most efficient time possible.

These tasks will be performed with respect to all manpower and manpower related programs, regardless of the funding source.

The Manpower Planning Advisory Council will be expected to assess program operations and efficiency on a continuing basis and recommend to the Governor new program linkages and approaches based on their perception of weak areas in program operations and gaps in the services provided.

State of Montana
Office of The Governor
Helena 59601

FORREST H. ANDERSON
GOVERNOR

TO: All Members of Montana Manpower Planning Advisory Council
FROM: Forrest H. Anderson
SUBJECT: Creation of the Montana Manpower Planning Advisory Council

IT IS HEREBY ORDERED AND DIRECTED that the MONTANA MANPOWER PLANNING ADVISORY COUNCIL be created under the Executive Reorganization Act of 1971 (Laws of Montana, 1971, Chapter 272) which authorizes the Governor of Montana to create advisory councils that will furnish advice, gather information, make recommendations and perform other activities which are necessary to comply with federal funding requirements.

The Council will develop program priorities and make recommendations to the Governor for manpower program funding designed to insure the greatest benefit to the citizens of the state of Montana without unnecessary duplication.

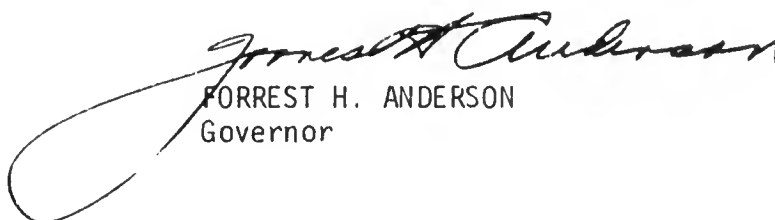

The Montana Manpower Planning Advisory Council will assess manpower program operations and efficiency on a continuing basis and make recommendations to the Governor's Office regarding "program mix" and development of innovative approaches in program operations based on the council's perceptions of weak points in present program operations and gaps in the delivery of manpower services.

Members of the Montana Manpower Planning Advisory Council shall be appointed by the Governor and will serve at his pleasure.

A member of the Governor's Executive Staff shall serve as chairman of the Montana Manpower Planning Advisory Council and the vice-chairman and a secretary shall be

selected from the members of the committee.

The Montana Manpower Planning Advisory Council will comply with Federal revisions to the Comprehensive Area Manpower Planning System and shall conform to the requirements of Section 82A-110 of the Executive Reorganization Act of 1971. The Council's purpose, composition, and members are prescribed in the attached approval and record for the Council.

FORREST H. ANDERSON
Governor

Functions of the
Montana Manpower Planning Advisory Council

The strength and quality of manpower services in Montana will be based on five basic functions of the Montana Manpower Planning Advisory Council. These basic functions are:

1. Coordination

- coordinate federal, state and local manpower agencies.
- concentrate all of the manpower resources available in Montana into an active, comprehensive, and cohesive manpower plan.
- develop "program mix" so that each program can be tied to related programs in order to develop a better delivery of services.

2. Technical Assistance

- develop statewide reports, reviews and supply writing assistance to local areas and agencies.
- supply statistical and technical assistance to agencies in preparing their program proposals.

3. Liaison

- act as a go-between for different agencies, programs and levels of government.
- develop a closer working intergovernmental relationship(s) between the local, state, and federal agencies so that manpower agencies may be aware of new ideas and programs.
- provide knowledge of available programs on an immediate basis.

4. Information

- make available a better working knowledge of programs to the state and local organizations.
- inform each manpower agency of any potential manpower programs that are being developed on a national basis.
- develop an informational system for the gathering of labor market data, manpower program evaluation, and other pertinent information.

5. Innovation

- encourage the development of innovative manpower programs in attempts to reach target populations.
- stress an effective delivery system of services to the individual trainee.

The State Council will guide the secretariat staff in developing the state manpower plan for the Governor. This will involve the assessment of needs and the establishment of priorities for specialized statewide program efforts. The plan will constitute the Governor's recommendations to all program agencies for the implementation of specific kinds and levels of programs and his request to the Regional Manpower Administrator for recommended funding.

The State Council will bear the responsibility for providing technical assistance and secretariat support to ancillary planning boards and assuring that the state plan fully considers the needs for program services of all portions of the state not covered by designated area councils.

The Governor, through the State Council, will have the authority to provide oversight, assess and evaluate program operations in those areas covered by his plan, and submit recommendations that reflect this authority.

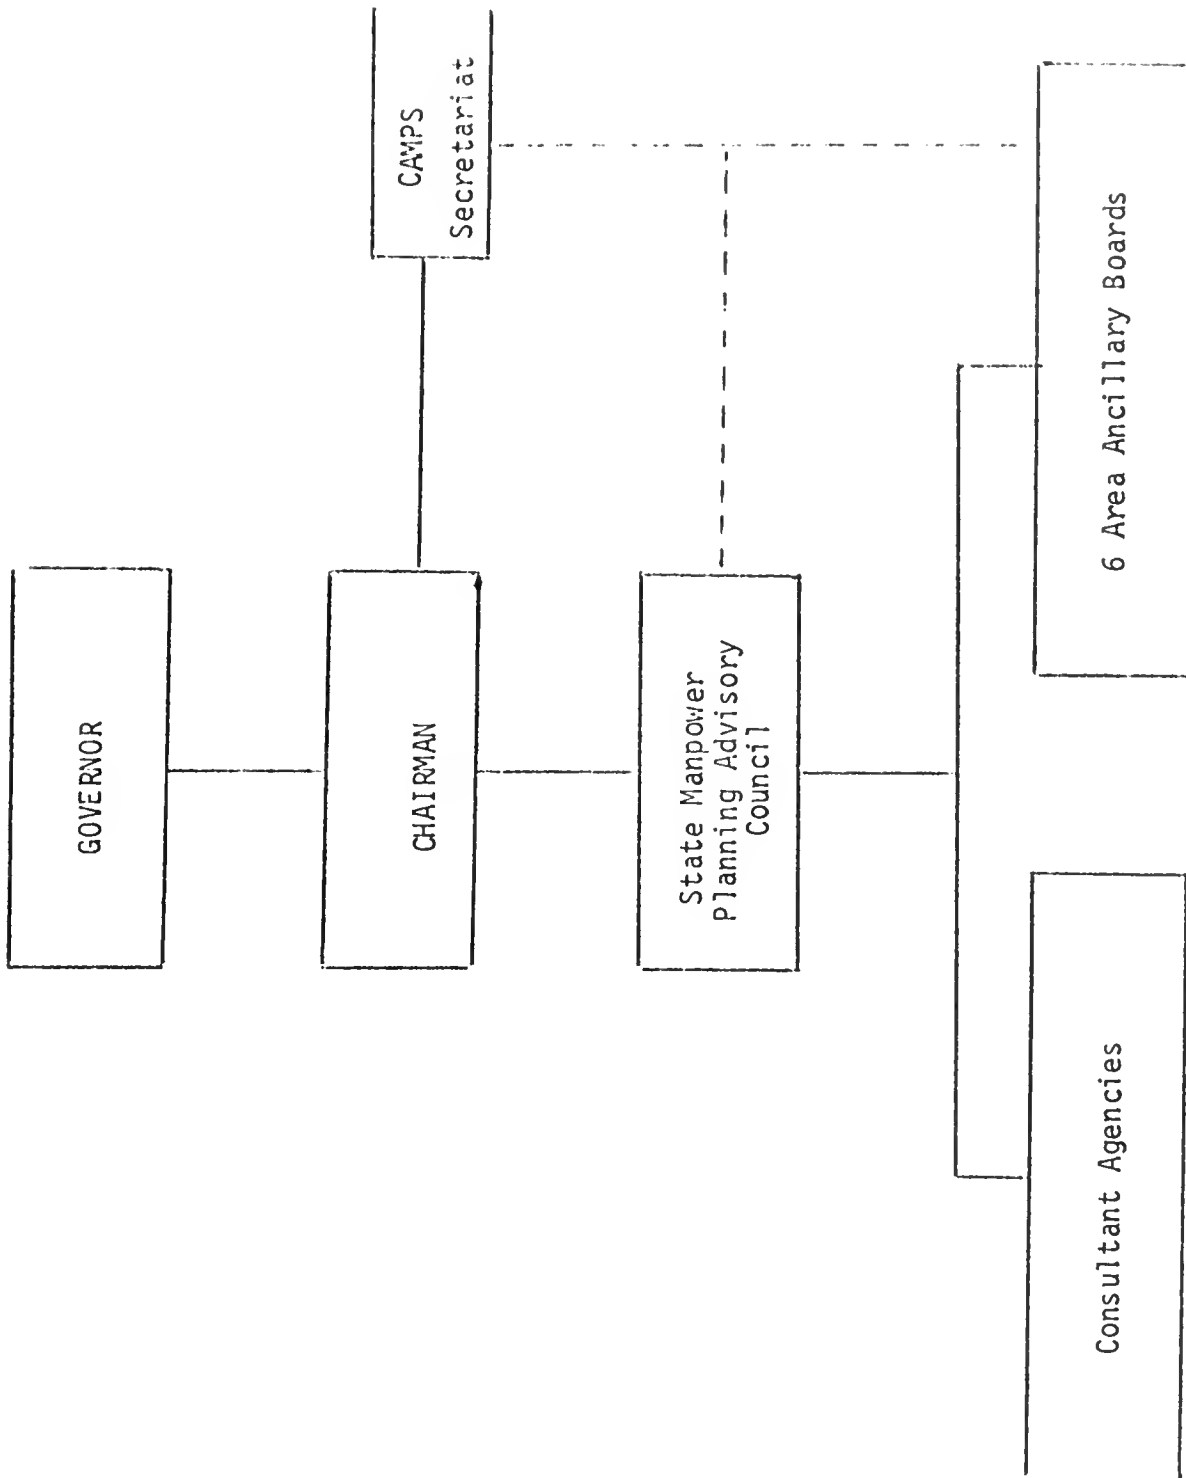

The Council and its staff will also perform the following defined functions under the direction of the Council chairman:

- Formulate goals, objectives and policy to govern the development and administration of manpower programs in Montana;
- Evaluate the objectives, activities, and delivery systems of all state manpower programs' effectiveness, efficiency, duplication of effort, and deficiencies in service;
- Prepare a comprehensive manpower plan for Montana that will identify the people to be served, formulate a mix of services, organize a delivery system of manpower services, and define agency roles and allocate available resources to provide optimum manpower services and resources to Montana's citizens requiring such services;
- Approve any modification of programs or new manpower programs, including, but not limited to, staff organization and numbers, physical facilities, services offered, and interagency agreements;
- Review and approve all applications for federal assistance in manpower programs in the state. This control over funding is the essential item for the proper functioning of the Council.

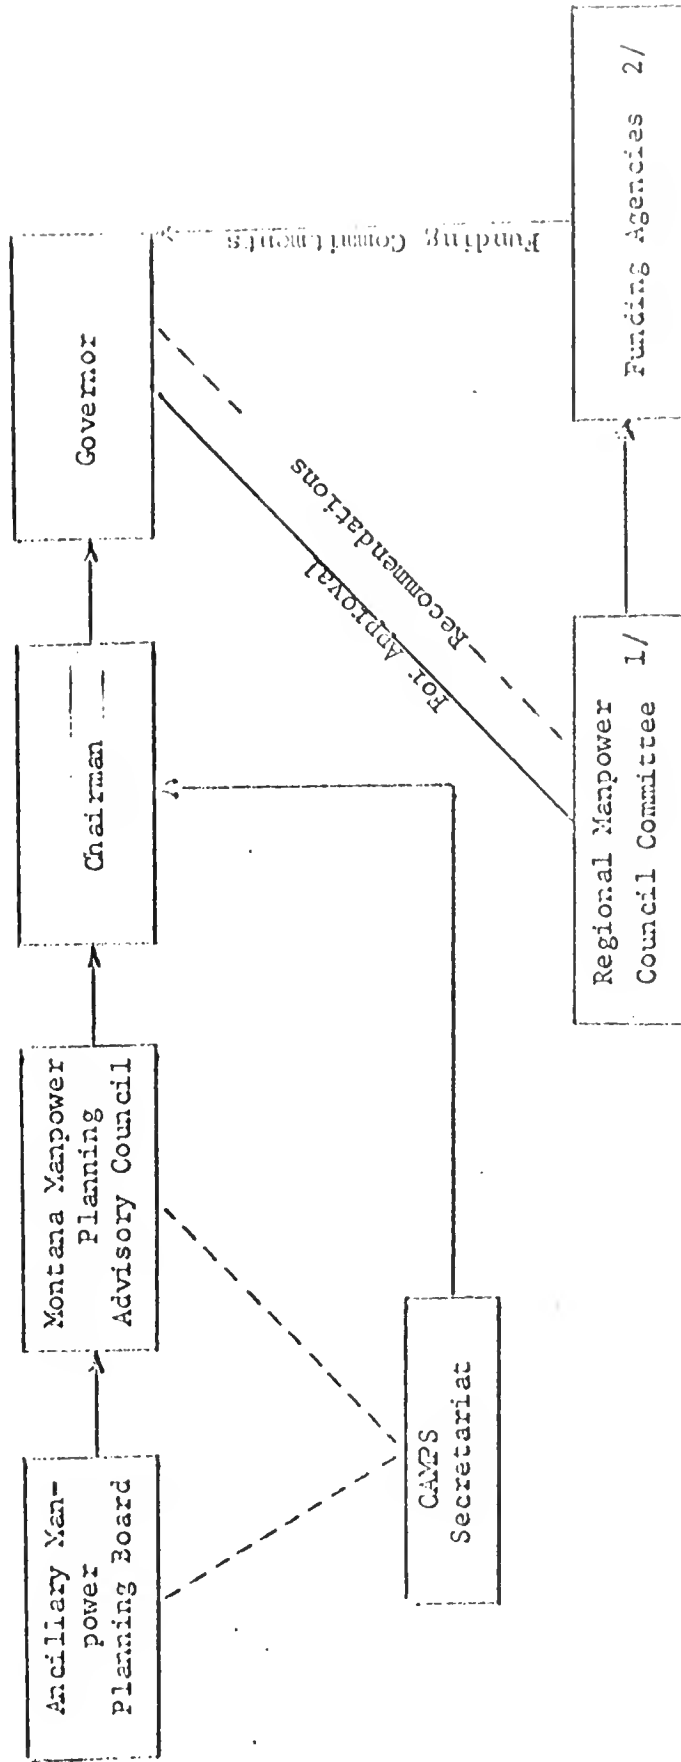

Comprehensive manpower planning must be a regular part of program development and administration. The Manpower Planning Advisory Council is the structure necessary for such a meaningful planning process.

Manpower Planning Advisory Council

Organization Chart

FLOW OF STATE PLAN

1/ State plans will be reviewed and approved in terms of adequacy of plan coverage, program linkages, relationship between programs, etc. The Regional Manpower Council Committee will make any recommendations on the plans as necessary to the Governor's Office.

2/ The Regional Manpower Council, after approval of plan, will make recommendations to funding agencies.

----- Technical Assistance/Recommendations

BY-LAWS OF THE
MONTANA MANPOWER PLANNING ADVISORY COUNCIL

ARTICLE I

NAME

The name of the council shall be the Montana Manpower Planning Advisory Council.

ARTICLE II

PURPOSE

The primary tasks of the Council will be to advise the Governor and the Regional Manpower Coordinating Committee of the needs of Montana for manpower services and of the locally conceived priorities among kinds of services required to address these needs; and to assist the Governor to develop comprehensive manpower plans for the state of Montana that recognize these needs and priorities and make recommendations for appropriate program funding. The Council will review and assess program operations to identify weak areas in program activities to strengthen the quality of existing manpower services.

ARTICLE III

MEMBERSHIP

SECTION I. MEMBERS. The Advisory Council shall consist of representatives of the broadest spectrum of interest in the state, with representatives evenly balanced insofar as possible between the various diversities. The membership model outlined shall be adhered to; however, sufficient flexibility will exist to modify the model where the need is clearly evident to the Governor.

A. Client Sector Representatives. These Council members will be chosen from among, and be representatives of, the basic population groups of manpower program clientele. Client group representatives shall have the confidence of the communities from which they are selected.

B. Agency/Sponsor Representatives. These Council members will be chosen from among, and be representatives of, the vendors of manpower and supportive services. Agency representatives shall be at a decision making level, competent to make commitments on behalf of their organizations.

C. Business/Labor Sector Representatives. These Council members will be representatives of business, labor, the general public and social welfare organizations, as appropriate. Representatives of these sectors shall be chosen on a basis of expertise in areas related to manpower planning.

If a member representing an organization terminates or voluntarily terminates his employment or changes his status with the organization and does not represent manpower programs or the public, the Governor may appoint, upon the advice of the Council, a new member. The Council shall make recommendations for replacement of representatives of organizations or agencies to the Governor. Representatives of counterpart Federal agencies, while not members of the Council itself, may serve when necessary as resource persons for the Council and may join task forces and similar groups when invited. There shall be no voting by proxy.

SECTION II. TENURE. Each member of the Council shall hold office at the pleasure of the Governor. Any officer or committee member may be recommended to the Governor for removal by a majority of the Council.

SECTION III. COMPENSATION. Each member of the Council may, unless he is a full-time salaried officer or employee of the state, be paid in an amount to be determined by the Governor, not to exceed twenty-five dollars (\$25.00) for each day in which he is actually and necessarily engaged in the performance of Council duties and shall also be reimbursed for actual and necessary expenses incurred while in the performance of Council duties. Members who are full-time salaried officers or employees of this state may not be compensated for their service as members, but

shall be reimbursed for their expenses. All compensation is dependent on the availability of funds for this purpose.

SECTION IV ANCILLARY COMMITTEES. With the approval of the Council and the Regional Manpower Coordinating Committee, the Governor may create ancillary manpower planning committees which will make recommendations concerning the implementation of specific kinds and levels of programs needed in their areas. These committees will have the authority to provide general oversight, assess and evaluate manpower operations, and submit recommendations to the Council. Selection of the area ancillary manpower planning committees will adhere to the same model as outlined for the Council.

ARTICLE IV

MEETINGS

SECTION I. MEETINGS. Meetings shall be held monthly on a pre-scheduled date for both the Council and the ancillary committees. Additional Council meetings may be called by the Governor, the Chairman, or a majority of the Council when deemed necessary. Council meetings shall be held in Helena.

SECTION II. NOTICE. Notice of all meetings and an agenda shall be sent by mail to the entire membership at least two weeks in advance of the meeting.

SECTION III. QUORUM. A majority of the membership constitutes a quorum to do business.

SECTION IV. CONDUCT OF MEETINGS. The Chairman shall preside at all meetings and the meetings shall be conducted in accordance with Robert's Rules of Order.

ARTICLE V

OFFICERS

SECTION I. The officers of the Council shall be a Chairman, Vice-Chairman and Secretary.

SECTION II. APPOINTMENT, ELECTION, QUALIFICATIONS, AND TERM OF OFFICE. The Chairman shall be the Governor or a designated member of his immediate executive staff. The Vice-Chairman and Secretary shall be elected by the Council members at their first regular monthly meeting. Officers, both appointed and elected, will serve one year terms. No officer, except the appointed chairman, may serve more than two consecutive terms. Should an officer cease to be a Council member, his term as officer shall also cease and a majority of the Council's membership shall elect a replacement for the remainder of his term.

SECTION III. DUTIES OF OFFICERS. The duties of the officers shall be such as usually attached to such offices.

SECTION IV. ANCILLARY COMMITTEE OFFICERS. Ancillary committee officers shall be appointed and selected by the procedures listed under Article V, Sections 1 and 3. The Governor shall appoint the chairmen of the ancillary committees.

SECTION V. AD HOC COMMITTEES. The Governor may appoint ad hoc committees to deal with special areas of interest. These committees shall be comprised on an equitable basis between members of the three major groups, to insure a broad spectrum of representation and sources of information. Selection of the ad hoc committees will adhere to the same model as outlined for the Council.

ARTICLE VI

FISCAL AFFAIRS AND PERSONNEL

SECTION I. FISCAL AFFAIRS. Fiscal affairs including the receipt or disbursement of money shall be administered as set forth by the Federal guidelines.

SECTION II. PERSONNEL. The Council shall be supported by a Secretariat Staff of professional manpower planners in the Governor's office who shall serve as a major source of continuity in Council operations, write plans under the guidance of the Council, gather information, provide background information, assemble information on

program operations and effectiveness, and provide technical assistance to ancillary manpower planning committees. The Secretariat Staff will undertake other assignments at the direction of the Chairman.

ARTICLE VII

APPEAL PROCEDURE

SECTION 1. The appeal procedure of the Council is as follows:

Applicants who believe that their viewpoint has not been adequately considered in Council deliberations may prepare dissenting reports which are to be appended to the plan submitted to the Governor.

Where the heads of local jurisdiction believe that the State Council has not adequately covered area needs for state services in their plan, they may so indicate in their comments to the Regional Manpower Coordinating Committee.

Heads of smaller jurisdictions located within an area may also have their dissenting views appended to the plans submitted to the Governor, when they believe that the area or State plan does not adequately consider the needs of their jurisdiction.

ARTICLE VIII

AMENDMENTS

The Council's by-laws may be altered, amended, or repealed and new by-laws adopted, in accordance with the Executive Reorganization Act of 1971 and other state and federal laws and regulations.

SECTION I. PROCEDURE. Amendments to these by-laws may be made only when:

A. Such amendment(s) is presented to the Council in writing at least fifteen (15) days prior to a regularly scheduled or specially called meeting of the Council.

B. The proposed amendment(s) receive an affirmative vote of two-thirds of the Council membership.

DEPARTMENT of NATURAL RESOURCES
LIBRARY

DESCRIPTION OF THE AREA

II. DESCRIPTION OF THE STATE

A. Geographic Location and Demographic Data

1. Location and Topographical Features

The state of Montana lies in the northwestern United States encompassing an area in excess of 145,000 square miles. It is bordered on the north by Canada, on the west by Idaho, on the south by Wyoming, and on the east by North and South Dakota. The western portion, corresponding roughly to CAMPS Areas I, II and III, is mostly mountainous terrain, made up of fertile mountain valleys, large rivers, and dense forested areas. The eastern two-thirds of the state constitutes the plains area, made up of mostly rolling terrain, broken hills, and large areas of flat grasslands. Montana's large area and great differences in elevation contribute to a highly diverse climate. Both the climate and the terrain are of special significance as they have much to do with the economy of the state.

2. Population Data - by CAMPS Area - 1970 Census

	<u>Total Pop.</u>	<u>Age Distribution</u>			<u>Non-White or Minority</u>	<u>% of Pop. Minority</u>
		<u>16-21</u>	<u>22-44</u>	<u>45 & over</u>		
Area I	154,691	17,711	42,460	44,743	4,597	3.0 %
Area II	80,231	8,114	19,009	28,581	1,197	1.5 %
Area III	86,869	12,544	23,197	25,804	1,151	1.3 %
Area IV	146,737	15,424	40,757	40,667	11,851	8.1 %
Area V	133,665	14,476	35,551	41,189	5,881	4.4 %
Area VI	92,152	8,914	23,165	28,700	6,689	7.2 %
TOTALS	694,345 ^{1/}	77,183	184,139	209,684	31,366	4.5 %

(Appendix I is a breakdown by county.)

3. Work Force Data - by CAMPS Area - CY 1970 Average

	<u>1970 Population</u>	<u>Civilian Work Force</u>	<u>Total Emp.</u>	<u>Total Unemp.</u>	<u>Unemp. Rate</u>
Area I	154,691	63,790	58,747	5,043	7.9 %
Area II	80,231	30,389	28,558	1,831	6.0 %

^{1/} This figure does not represent the 64 individuals living in Yellowstone Park, Montana, which is not included in any county or CAMPS area.

3. Work Force Data - by CAMPS Area - CY 1970 Average (Cont.)

	<u>1970 Population</u>	<u>Civilian Work Force</u>	<u>Total Emp.</u>	<u>Total Unemp.</u>	<u>Unemp. Rate</u>
Area III	86,933	37,515	35,220	2,295	6.1 %
Area IV	146,737	56,766	52,932	3,834	6.8 %
Area V	133,665	55,637	52,354	3,257	5.9 %
Area VI	92,152	37,968	35,389	2,579	6.8 %
TOTALS	<u>694,409</u>	<u>282,100</u>	<u>263,200</u>	<u>18,800</u>	<u>6.7 %</u>

(Area and Item totals may not add due to rounding. Appendix IV is a breakdown by county.)

4. Income Structure

Montana's per capita income growth has not kept pace with the national levels. From a ranking of 12th among the states in per capita personal income in 1950, Montana has dropped to 31st in 1968. Dependence on agriculture and the slow progress in non-agricultural industries, due to a national decline in the mining and railroad industries, are the root causes of the population's income problems. No drastic change in the basic structure of Montana industry is foreseen, so continued slow growth (compared to the nation) in per capita income is indicated. Rural areas will be especially hard pressed economically.

Appendix VII is a distribution of family money income by county. This table indicates where the low level incomes are located, mostly the rural counties of the state. Although the data is from 1959 it can be reasonably assumed that the breakdowns are still relevant.

B. Economic Change 1960-1970 and Anticipated Developments 1971-1975

1. Population Changes 1960-1970

	<u>1970 Pop.</u>	<u>1960 Pop.</u>	<u>Change</u>	<u>% Change</u>
Area I	154,691	125,527	+ 29,164	+ 23.2 %
Area II	80,231	87,515	- 7,284	- 8.3 %
Area III	86,933	76,983	+ 9,950	+ 12.9 %
Area IV	146,737	147,636	- 899	- 0.6 %
+ Area V	133,665	131,530	+ 2,135	+ 1.6 %
+ Area VI	<u>92,152</u>	<u>105,576</u>	<u>- 13,424</u>	<u>- 12.7 %</u>
TOTALS	<u>694,409</u>	<u>674,767</u>	<u>+ 19,642</u>	<u>+ 2.9 %</u>

(Appendix VI is a breakdown by county.)

Generally, those counties primarily based on an agricultural economy lost population due to the technological changes and mechanization affecting the agriculture industry. The limited number of industries and lack of year-round job opportunities forced many to leave the state in search of employment.

Montana experienced a net out-migration of 58,026 persons from 1960 to 1970 as reflected in the following statistics:

1960 Census Population	674,767
Births 1960-1970	143,494
Deaths 1960-1970	65,826
1970 Pop. by Natural Increase	752,435
1970 Census Population	694,409
Net Migration	- 58,026

Those who left, most of whom were in the 18-24 age group, found opportunities and employment possibilities greater outside the state of Montana. ^{2/}

2. Anticipated Job Opportunities by Major Occupational Groups, 1970-1975

New job opportunities will be in the areas of Professional and Technical Workers, Managers, Clerical Workers, Sales Workers, Construction Craftsmen and Foremen, Operative and Kindred Workers, and Service Workers. Many of these occupations require education and training beyond the capacity of existing manpower programs and only opportunities which can be related to manpower training will be mentioned in this report. The following is a list of potential openings by each major occupational category: ^{3/}

a. Professional, Technical & Kindred Workers

<u>Occupation</u>	<u>No. of Anticipated Job Openings 1970-1975</u>
Medical Technicians	480
Teachers, various	3,100

b. Clerical and Kindred Workers

Stenographers & Typists	3,110
Bookkeepers	1,560
Cashiers and Checkers	730

^{2/} Annual Manpower Planning Report, page 10.

^{3/} "Montana Manpower 75", pages I-6 through I-10.

c. Craftsmen, Foremen and Kindred Workers

<u>Occupation</u>	<u>No. of Anticipated Job Openings 1970-1975</u>
Linemen	220
Carpenters	520
Mechanics, Motor	480

d. Service Workers

Protective (Firemen, Policemen, Guards)	510
Cooks, various	1,440
Waiters and Waitresses	1,550
Attendants, Hosp. & Inst. (Nurse Aides)	1,690
Janitors	1,310
LPN's	560

Planning course enrollment levels and content of manpower training programs will be based on expected job opportunities during the next fiscal year and tailored to local needs.

C. Anticipated Industrial Development

Little or no large-scale industrial development is expected in Montana during the next fiscal year. Remoteness from large population centers tends to rule out new manufacturing industries which are market oriented. The possibility of expansion of the mining industry, with new operations at Lincoln, Nye and Troy, does exist, due to the impending takeover of Anaconda Company holdings by the government of Chile. They would be highly mechanized operations and the labor needed would be highly skilled.

Another industry that is important to Montana's development and economic growth is tourism. As more money and leisure time become available and people are becoming more mobile, the tourist industry, during the summer months, has grown substantially the past decade. Tourism has been slow in off-season months, particularly during the winter, but with the proposed Chet Huntley and Chrysler Corporation project to develop the Big Sky recreation complex south of Bozeman and the expansion of Big Mountain winter resort near Whitefish and other winter activities, this industry should experience new opportunities for growth. Any

employment opportunities created by such developments would be in Service and Retail Trade industries.

The Anti-Ballistic Missile project at Malmstrom Air Force Base and the actual sites near Conrad and Shelby have fallen behind on the construction phase. Problems have arisen in regard to the high bids that have been submitted for the project. Another possible problem area is the 10% minority hiring requirements of federal contracts. Efforts are being made by Indian representatives to have area Indians hired to fulfill these requirements.

The AVCO Corporation is continuing to develop the closed Glasgow Air Force Base. A portion of the base has been recently designated as a "dispersal base" for the Air Force. A regional skill training center is also planned for the base. This center should begin operations this fall.

Attempts to attract industry to the Model Cities projects in Butte and Helena are continuing. The Butte Model Cities have several small industries proposed to move into their recent Industrial Park Complex. A recently released Economic Base Study of the Helena area indicates that there will be no new developments in that area, only expansion of the present types of industry.

D. Employment Distribution by Industry - 1960 & Estimated 1975 ^{4/}

The following diagrams indicate the changing industrial structure of Montana's employed work force from 1960 to 1975.

EMPLOYMENT
1960

ESTIMATED EMPLOYMENT
1975

^{4/} "Montana Manpower 75", page I-3.

IDENTIFICATION OF MANPOWER PROBLEMS

III. IDENTIFICATION OF MANPOWER PROBLEMS

A. Unemployment Rate - 6.7% (1970 Annual Average)

(For average unemployment figures by CAMPS Area, see Labor Force Data in Part I of this report.)

B. Trends in Unemployment

Employment in Montana is very seasonal in nature mostly because of the agriculture, lumber and tourist oriented industries. Unemployment in Montana ranged from 24,500 individuals in February 1971 to a low of 14,100 in October 1970. ^{5/} By June 1971, 22,500 persons were unemployed, which represents 7.2% of the work force. The largest concentration of unemployment occurs on Montana's seven Indian Reservations where the unemployment rate normally runs between 30% and 50% of the work force. ^{6/}

The following Montana counties are currently classified as areas with high unemployment by the U. S. Department of Labor:

<u>County</u>	<u>County Seat</u>	<u>Unemp. Rate (1970 Avg.)</u>	<u>Labor Supply Classification</u>
Carbon	Red Lodge	7.2 %	Persistent
Flathead	Kalispell	9.0 %	Persistent
Glacier	Cut Bank	15.5 %	Persistent
Granite	Phillipsburg	9.4 %	Persistent
Lewis & Clark	Helena	6.8 %	Substantial
Madison	Virginia City	6.2 %	Persistent
Meagher	White Sulphur Springs	9.3 %	Persistent
Mineral	Superior	8.3 %	Persistent
Musselshell	Roundup	6.9 %	Persistent
Park	Livingston	8.4 %	Persistent
Ravalli	Hamilton	8.3 %	Persistent
Silver Bow	Butte	6.9 %	Persistent
Stillwater	Columbus	7.2 %	Substantial
Valley	Glasgow	8.2 %	Persistent

Montana's seven Indian Reservations also qualify as areas with persistent unemployment problems. These counties (and reservations) are eligible for special aid, including manpower training programs, under the Economic Development Act. The Montana Manpower Planning Advisory Council should be utilized in the planning of

^{5/} Montana Employment and Work Force, Vol. I, No. 6, page 6.

^{6/} Montana Annual Manpower Planning Report, page 19.

requests for this special EDA aid. The Economic Development Administration has not participated in CAMPS at the state level even though it has been invited.

C. Identification of Factors Causing Unemployment

Unemployment has risen rapidly due, in part, to recent national economic conditions. Montana's unemployment may also increase if the current copper industry strike becomes a prolonged situation, as in 1967-68. The increased unemployment has included skilled or professional workers but the basic problem continues to be the poor and disadvantaged persons who have problems just entering the labor market. They lack the basic skills and/or education necessary to compete for even the simplest low paying jobs. Youth who have never been trained for an occupation and divorced women who have never been in the labor force make up a large portion of this group.

Social difficulties, such as police records, physical or mental handicaps, lack of transportation, and lack of child care prohibit even the job-ready individual from going to work. Supportive services that complement job training are necessary to solve these problems.

1. Underutilized

Underutilized are those individuals presently employed or not in the work force, who are not utilizing their full capacity to earn a living for themselves and their families. ^{7/} This category includes the following sub-groups: (1) employed part-time due to inability to find full-time employment, (2) employed full-time but with family income at or below poverty level, and (3) not in the labor force but should be - those persons who are not actively seeking work but should be.

The underutilized represents a large group in Montana (see Appendix III for a breakdown) with most of the persons being classified as working full-time but at poverty level income. The problem is especially evident in rural areas where agriculture is the main industry. The lack of primary industry, which pays good

^{7/} Annual Manpower Planning Report, page 5.

wages, and the dependence of the economy on employment in the traditionally low-wage retail and service industries also adds to the underutilization problems.

2. Disadvantaged

Disadvantaged are those persons with incomes below the defined poverty level who meet one or more of the following criteria: (1) youth under age 22, (2) high school dropout, (3) minority group member, (4) older worker over 45, and (5) handicapped. Appendix V is a breakdown of the disadvantaged population.

A special problem in the disadvantaged population in Montana is that Indians make up a vast majority of the minority population. Coordinated planning is needed to assure that both reservation and "landless" Indians are provided the manpower services they need.

D. Occupational Shortages - Current Job Opportunities ^{8/}

Employment opportunities, as reflected by U. S. Department of Labor Form MA-7-25A (Nov. 1969), Labor Demand in Hard to Fill Openings, are as follows:

Occupational Title	Number of Unfilled Openings 30 Days or More	Number Range Anticipated In Next Fiscal Year
General Duty Nurse	10	10 - 20
Medical Technologist	4	2 - 10
LPN	6	5 - 15
Accountant	5	5 - 10
Office Manager	4	1 - 5
Manager Trainee	15	10 - 20
Caseworker	8	5 - 10
Parts Clerk	8	5 - 15
Salesman, General	11	10 - 20
Salesman, Driver	4	5 - 10
Waitress, Informal	15	10 - 20
Cook	17	10 - 25
Cook, Ranch	6	5 - 10
Cosmetologist	4	1 - 5
Child Care Attendant	100	85 - 125
Guard	14	10 - 15
Janitor	10	10 - 15
Ranch Hands	12	10 - 20
Ranch Hand, Livestock	40	20 - 45
Farm Hand	225	200 - 300

Occupational Title	Number of Unfilled Openings 30 Days or More	Number Range Anticipated In Next Fiscal Year
Sugar Equipment Operator	25	25 - 30
Butcher, All-around	6	5 - 10
Boner	6	5 - 10
Machinist	5	1 - 5
Auto Mechanic	36	30 - 50
Farm Equipment Mechanic	4	2 - 5
Diesel Mechanic	15	15 - 30
Mill Wright	6	5 - 10
Saw Filer	7	5 - 10
TV Repairman	6	5 - 10
Core-Layer, Plywood	6	5 - 10
Upholsterer	10	5 - 10
Boilermaker	6	3 - 6
Auto Body Repairman	8	10 - 15
Welder, Combination	5	5 - 12
Painter	7	10
Carpenter	51	50 - 65
Roofer	5	7 - 15
Transport Driver	4	1 - 5
Service Station Attendant	11	5 - 20
Tractor Operator, Logging	4	1 - 5
Rotary Drill Operator	4	1 - 10
Miner I	90	50 - 75

The above list represents those occupations in which 4 or more unfilled openings, 30 days or more, occurred during the past fiscal year. This list in no way represents all demand occupations. However, it does show the types of occupations which are normally hard to fill. Demand occupations vary from one part of the state to another and from month to month.

E. Economic Assumptions

During the five year period from 1970-1975, planning for manpower services will be based on the following assumptions: ^{9/}

1. Intra-state migration of agricultural workers and their families will continue at least for the first 2-3 year period although at a slower rate. The population of agricultural counties should stabilize by 1975.

2. Most population increases will occur in the urban areas, particularly Helena, Missoula, Great Falls, Bozeman, and Billings. The rate of this increase

will continue at about the same rate due to slow industrial development.

3. Net migration from the state will continue through 1975, particularly in the 18-24 year age group.

IDENTIFICATION OF TARGET POPULATION

IV. IDENTIFICATION OF TARGET POPULATION

IDENTIFICATION OF TARGET POPULATION FOR FY 1972

STATE OF MONTANA

Estimated number of persons needing manpower services by characteristics relevant to their employment problems.

TARGET GROUP	NUMBER OF PERSONS
1. Unemployed (Poor Only) <u>10/</u>	3,162
2. Underutilized (Poor Only) <u>10/</u>	23,395
a. Employed Poor	19,903
b. Part-Time Employed	1,480
c. Not in Labor Force, But Should Be	2,012
3. Total Universe of Need <u>11/</u>	109,262
a. Poor	33,744
(1) Disadvantaged <u>12/</u>	26,557
(a) Youth - under 22	2,847
(b) Older Workers - over 45	9,661
(c) Minority Group Members	8,695
(d) High School Dropouts	4,509
(e) Handicapped	6,082
(2) Other Poor	7,187
b. Non-Poor	75,318
(1) Near Poverty	20,674
(2) All Other Non-Poor	54,644
4. Persons not included in the target group who may become part of the target population during the year due to technological change, adverse economic conditions, etc.	2,500

10/ Appendix III is a breakdown of the Unemployed and Underutilized Disadvantaged by county.

11/ Appendix II is a breakdown of the Universe of Need by county.

12/ Appendix V is a breakdown of the disadvantaged groups by CAMPS area.

Post-Secondary			3,500	4,444	
Adult			1,500	3,112	
3. Office of the Superintendent also cooperates with the Employment Service in planning MDTA Institutional proposals.					

This section consists of brief descriptions of each agency's programs and the relation they have to the total area of manpower training. The statements indicate what phase of manpower training services the agency provides itself and how clients are referred for additional services.

1. Bureau of Indian Affairs

The BIA assists Reservation Indians in attaining their economic independence. Its Division of Employment Assistance offers the following three specific programs: (1) Direct Employment - provides needed services to relocate Indians to areas where a job is available, (2) Adult Vocational Training - job training and basic education provided on reservation sites and the Bureau's four residential training centers, and (3) On-The-Job Training - training provided on or near reservations with supportive services available.

The BIA refers individuals to MDTA training programs, many of which are set up on reservations. Linkages with Vocational Rehabilitation, Employment Service, and other agencies attempt to provide a full range of services to individuals. The BIA is also a source of work sites for NYC and Mainstream programs on the reservations.

2. U. S. Dept. of Housing and Urban Development

HUD representatives have not participated in CAMPS at the state level but have done so through the Model Cities Programs in operation in Butte and Helena. The Model City Agencies work as coordinating facilities between the other groups and as a source of intake from the Model City target population. Model Cities operates Sheltered Workshops for the handicapped in Butte and Helena as a joint effort with the Division of Vocational Rehabilitation. Summer work programs for youth are also provided in the two communities through Model Cities.

As principally an intake and planning agency, Model Cities refers residents to manpower programs in Butte and Helena. Manpower needs for Model Cities are filled

by the Employment Service local offices and Concentrated Employment Program Centers.

3. Division of Comprehensive Health Planning

CHP provides direct leadership and assistance to local areas in comprehensive health planning. The agency attempts, through planning on the local level, to provide low income people with adequate health care. Montana has a shortage of medical personnel, particularly in rural areas. While these problems are not direct manpower training ones, they are part of the supportive services area. The Division also indicates which health-related professions are in demand and these occupations might be related to manpower training.

4. U. S. Economic Development Administration

EDA promotes economic and human resource development in depressed (economically) areas through grants and loans for public works, low cost business loans, grants for planning and studies of local economic development plans. EDA has not actively participated in CAMPS on the state level, even though the mentioned services certainly can be tied to manpower training programs.

5. State Employment Security Commission

The Montana State Employment Service, Division of the ESC, offers a complete range of manpower services to the target group individuals. The 23 local offices of the Employment Service offer intake, placement, counseling, testing, labor market information, and referrals to training to individuals. The Employment Service offers training through its MDTA Institutional, UPTO, and OJT projects. JOBS and JOPS offer varied on-the-job training opportunities. The CEP program, offering a complete range of manpower services to the disadvantaged individual in a six-county area, is administered by the Employment Service. The WIN program, a cooperative effort by the Dept. of Public Welfare and the Employment Service, provides a full complement of manpower services to eligible AFDC wel-

fare cases. The Employment Service (ESC) has also been selected by the Governor to administer the recently passed Emergency Employment Act for the state. The Unemployment Insurance claims paid to the temporarily unemployed are another service of the ESC, through its UI Division.

The Employment Service coordinates its efforts with other agencies on both the individual and administrative levels. Local offices, CEP Centers and WIN Centers refer eligible persons to Vocational Rehabilitation, Welfare, and Community Action Agencies, for various supportive services. Interagency referrals to provide the best possible service to the individual are the goal of the Employment Service linkages.

6. Montana State Department of Public Welfare

The DPW provides grant assistance to the blind, the disabled, the aged, and dependent children; and, in addition, helps to provide day care, medical assistance and other supportive services. The WIN program, a joint effort of DPW and ES, attempts to move AFDC cases from their dependent status to productive employment through job training and a variety of supportive services. The Com-preHealth Program in Lewis & Clark County is a pilot program in providing health insurance to the needy. DPW also operates training programs within the agency to train social workers and aides. A joint program of aid to the needy blind is operated in cooperation with Voc-Rehab.

The DPW coordinates with other agencies to provide its cases with the opportunities present. Referrals are made to the E.S. and DVR for job placement or training.

7. Office of the Superintendent of Public Instruction

The Office of the Superintendent of Public Instruction provides vocational training opportunities through 122 high schools, three community colleges, one institution of higher learning, five vocational-technical centers and four

state-maintained institutions. The OSPI works with the Employment Service on the planning level of the MDTA programs. The OSPI is responsible for and conducts the institutional training portion of MDTA programs. The OSPI is responsible for and conducts related training for the apprenticeship programs throughout the state.

8. Montana State Division of Vocational Rehabilitation

The DVR provides a complete range of manpower services to the handicapped individual. Counseling, job training, supportive services, and job development are provided. All phases take somewhat longer for the handicapped individual to complete; therefore, there is a significant carryover factor.

Eligible clients are referred to MDTA or Vo-Tech training programs. Handicapped individuals usually need more intensive and individualized training, so special programs are set up.

9. Montana State Department of Health

The State Dept. of Health is a resource area for (1) supportive services by county health departments and (2) possibilities for training in health-related occupations.

10. Montana State Office of Economic Opportunity

The State OEO attempts to assist and coordinate local CAA Agencies and other projects funded by OEO. These agencies are principally concerned with the organization of poor people; they are intake agencies. The local CAA's also contain many programs which provide supportive services to manpower trainees.

The State OEO assists in the planning of programs to help the poverty level target group. The State OEO is operating a Public Service Careers Program to help upgrade the employees of local government throughout Montana.

11. U. S. Civil Service Commission

The Civil Service Commission participates in CAMPS as a representative of

federal employers, to assure that information on manpower programs is incorporated in Federal agency staffing plans. The Federal Government, is, after all, the nation's largest single employer. The Commission operates no manpower programs and serves only as a source of jobs.

12. U. S. Department of Labor, Manpower Administration

The Manpower Administration has control over NYC and Operation Mainstream programs in Montana. These programs are delegated to CAP's and Indian Tribes. The MA assists all agencies in obtaining grants for manpower programs. The MA also monitors the operation of all DOL manpower training programs.

13. U. S. Department of Labor, Bureau of Apprenticeship and Training

The BAT provides for the promotion, improvement, and expansion of apprenticeship and other industrial training programs. The Bureau anticipates approximately 140 new registrants during the FY. Registrants are referred by the unions and tested by the Employment Service. Current economic conditions have caused a decline in the number of apprentice openings.

14. U. S. Department of Agriculture

The U. S. Dept. of Agriculture is a source of supportive services. The Extension Service offers many services to all state residents including the disadvantaged. The Soil Conservation Service and the Forest Service are sources of employment for trainees. The USFS also has limited training programs during the summer.

The Extension Service in each county serves as a source of referrals to training programs.

15. Farmers Union

The Farmers Union operates the Green Thumb Program in Montana. Green Thumb offers work experience to older retired workers in thirteen counties. The program is designed to provide supplemental income to individuals on a fixed income

of Social Security benefits. Expansion of the program in fiscal year 1972 is being contemplated.

TABLE I

EVALUATION OF RESOURCES IN RELATION TO NEEDS

<u>Type of Service</u>	<u>Total Universe of Need</u>	<u>(Current Resources) Number Served</u>	<u>% Served</u>
1. Intake	109,262	78,177	72 %

A complete breakdown of how the manpower programs serve the target groups is in Appendix IX. This table only shows persons effectively served.

PRIORITIES

PRIORITIES

The following priorities are based on the unmet needs presented in this report. Some could be met by expansion of present services while others would require new programs.

A. Priorities in Respect to Target Population

Table II indicates that Montana's manpower programs are only serving a minority of the target groups and a very small minority in some cases. Unemployed and poor categories appear to receive more service but this is logical due to their almost total lack of employment and income. Types of service available to the different groups should also be taken into consideration. Although relatively high percentages of the youth and handicapped groups receive services, these services consist of work experience, and not permanent job placement.

Manpower programs should be continued at least at the present levels. Any expansion in relation to target groups should relate to the following priorities which are based on the unmet needs of target and special groups.

Dropout Youth Between Ages 15-18 - Youth under age 18 continue to be a manpower problem. Such persons cannot find work until they are 18 due to employer liability requirements. Consequently they are not eligible for most training programs because a job cannot be developed for them upon completion of training. NYC currently has 111 slots in its out-of-school programs which meet possibly 5% of the target group. New programs or expansion of present ones to serve this group should be considered.

Older Workers - The only source of income for many older individuals is their Social Security benefits; therefore, many of these people exist on a poverty level income. Attempts to train or re-train older people and place them in employment have been largely unsuccessful due to many factors. The CAMPS Committee feels that programs to supplement these older workers' meager incomes, such as Public Service Work, are necessary. The Green Thumb program provides this type of work to a

limited number of male, older workers in rural areas of Montana. Similar programs should be provided for females and include urban areas.

Employer of Last Resort Concept - Individuals involved with manpower training have constant contact with individuals who have been identified through counseling sessions as unable to compete in the open job market and probably could never be trained to work under working standards. Programs such as the existing Sheltered Workshops are needed to provide employment for these individuals. It would be a concept of subsidized, sheltered, employment of last resort, not a program of training for an outside occupation.

Rural Residents & Ex-Farm Workers - Rural areas of Montana have economies based solely on agriculture. The mechanization of farming and the subsequent loss of jobs in farming cause "depressed" economic conditions in some rural areas. Agriculture is also a very seasonal source of employment and unemployment runs as high as 15-20% in the winter in some rural areas. Economic development which would create jobs tends to locate in urban areas even in a sparsely populated state like Montana. Serious attempts need to be made to develop industry and jobs in rural Montana.

SPECIAL PRIORITY - Veterans - Although veterans are not a designated target group for CAMPS planning, the Montana State CAMPS Committee feels that manpower services to the veteran should be stressed. As men have returned from service in Southeast Asia and been discharged from the Armed Services, they have found it increasingly difficult to locate employment. The Veterans Administration has assistance programs available to the veteran and these programs should be evaluated and possibly expanded. Unemployment among veterans is a major problem in the contemporary labor market and the state of Montana is no exception to that fact. Action should be instigated as soon as possible as no slowdown in the number of returning veterans is expected.

B. Priorities in Respect to Services

Table I shows that while much of the target population receives intake type service, a far smaller proportion receive training, placement, or other types of

services. Services are needed for the full range of service needs. Many people are with no additional service needs for the individual.

Expanded mental health services following priorities:

Diagnostic services for the individual and how he can be helped. Agencies working with training programs do not really know what occupational therapy is. In-depth study of the individual's needs would result in a much better service. Such services are available in some facilities is a definite need in Montana.

Transportation is a major problem for a large number of people in the major urban areas of Montana but several have none at all. A survey in Area III (Helena) indicated that it would be one of the large user groups. It should be placed on making such proposals. Transportation problem occurs in the rural areas of Montana. Transportation is almost non-existent, especially on the routes. Travel to work is by private car. Much of the target population.

Day Care is a problem that day care problems are the major reason for leaving or quitting their employment. A study is planned to study child care in Montana. There are many of such care but are usually the cost of the committee stresses the need for inexpensive care to be fully utilized.

Public Service Employment - Employment in public service fields is needed as a source of job openings during periods of economic slowdown. Trainees cannot be placed on jobs when none exist, so they must be created. The STEP program is an example of this type of employment. It should be clarified that such programs are needed only in periods of high unemployment when job openings are non-existent. This priority would not be listed during periods of low unemployment; for instance, under a 4% rate. Recent national developments, especially the Emergency Employment Act, may affect this priority.

Health Services - Poor health is another reason for dropouts from manpower programs. The problem is twofold including both the high cost of services and the complete lack of some services. Mental health services should be included as well as physical aspects. The CompreHealth program in Helena is a pilot program providing health insurance coverage to low income people. Programs for drug addicts and alcoholics should be initiated or expanded. The area of health services is too large to make a specific priority item but new funding in any of the previously mentioned areas is desirable.

Economic Development - The underlying cause of many of Montana's manpower problems is the lack of economic development. Training programs are difficult to operate when there is no source of jobs. Manufacturing assembly-line type jobs are virtually non-existent in Montana. Continued efforts to bring development to the state are supported by the CAMPS Committee.

Follow-up Services - Follow-up services should be initiated to determine if trainees stay on the job after placement. Information gathered would be useful in the planning of current and future programs. Judgments of the success or failure should not be based on placement but on permanent placement.

Expanded Outreach - Rural residents are not served by the majority of manpower programs as the personnel is just not available to outreach them. Sparse population and long distances make outreach efforts seem fruitless when compared to normal outreach in urban areas. The possibility of having a worker who out-

reaches for all programs in a rural area deserves serious consideration.

C. General Manpower Strategy

The Montana Manpower Planning Advisory Council has developed program priorities and made recommendations for manpower program funding to insure the greatest benefit to the citizens of Montana, particularly the disadvantaged and poor. The Council has only recently been organized and this document represents only a foundation for truly comprehensive manpower planning for fiscal year 1972. Stress will be placed on the evaluation of existing programs on a constant and continuing basis, not a once a year planning session. Innovative approaches in program operations based on the Council's perceptions of present programs will be encouraged.

Comprehensive manpower planning must be a regular part of all program development and administration within the state. Program and course development will be left to the agency involved but the Council reserves the right of review. The Council will insure that manpower programs are relevant in regard to target groups served, occupational courses offered, and range of services provided. Particular emphasis should be placed on what occupations trainees are being prepared for. Occupational training should pertain to the number of available job openings, the skill levels necessary, the expenses of such training, and the possibility of career development in the occupation.

The right to amend or append this plan is expressly reserved for the Council and the Governor. Changes and recommendations on the local levels will be developed as the local ancillary boards are established and functioning.

LIST OF SOURCES OF INFORMATION

- Interagency Cooperative Issuance No. 72-2, Structural and Functional Revision of CAMPS - May 1971
- Interagency Cooperative Issuance No. 72-1, National Policy Guide, for FY 1972 - May 1971
- Interagency Cooperative Issuance No. 71-1, National Planning Guidance for FY 1971 - May 1970
- Montana Employment and Work Force - Monthly Reports by Employment Service Research and Analysis, Employment Security Commission - January - August 1971
- Social Characteristics of Applicants - Montana Manpower Programs 1970 by Employment Service Research and Analysis, Employment Security Commission - May 1971

^{1/} Includes strikers not counted as employed or unemployed.

APPENDIX V

DISADVANTAGED - FY 1972
(Breakdown by Target Group)

CAMPS Area	Total	Youth	Older Workers	Minority	Dropouts	Handicapped
Area I	7,428	796	2,702	1,725	1,261	1,701
Area II	2,709	290	985	629	460	620
Area III	4,136	443	1,504	960	702	947
Area IV	4,541	487	1,652	1,054	771	1,040
Area V	4,539	487	1,650	1,054	771	1,039
Area VI	3,203	343	1,165	744	544	733

The total of all five categories will not equal the total number of disadvantaged persons as some persons may be included in more than one group. The above figures include only those who are considered "poor" and in need of employment assistance.

APPENDIX IX
PLANNED SERVICES FOR TARGET GROUP
STATE OF MONTANA FY 1972

Definition of Disadvantaged

A Disadvantaged Individual, for manpower program purposes, is a poor person who does not have suitable employment and who is either (1) a school dropout, (2) a member of a minority, (3) under 22 years of age, (4) 45 years of age or over, or (5) handicapped. An individual can be a member of more than one of these groups.

An individual is deemed a member of a poor family if he (she) is a member of a family (1) which receives cash welfare payments, or (2) whose annual net income in relation to family size and location does not exceed the following criteria:

<u>Family Size</u>	<u>Income--Urban</u>	<u>Income--Rural</u>
1	\$ 1,900	\$ 1,600
2	2,500	2,000
3	3,100	2,500
4	3,800	3,200
5	4,400	3,700
6	5,000	4,200
7	5,600	4,700

Individuals who do not have suitable employment are (a) the unemployed, (b) the underemployed, and (c) persons hindered from seeking work.

The following five definitions are also used in determining who is disadvantaged:

School Dropout - A school dropout is a person who has not graduated from high school (completed 12 years of school).

Member of a Minority - Members of a minority are Negroes, American Indians, Japanese, Chinese, Filipinos, Koreans, Polynesians, Indonesians, Hawaiians, Aleuts, Eskimos, Mexican-Americans, Puerto Ricans, and other people with Spanish surnames.

Under 22 Years of Age - Individuals under 22 years of age are called "youth". People are classified as "youth" until they reach their 22nd birthday.

45 Years of Age and Over - Individuals 45 years of age or over are called "older workers". People are classified as "older workers" starting from the date of their 45th birthday.

Handicapped - A handicapped worker is one who has a physical, mental or emotional impairment or chronic condition which could limit work activities. Included are persons with a history of alcoholism and of drug addiction. Paroltees, prison releasees, and other persons whom history of law offenses proves to be a barrier to employment are considered to be "handicapped".

PLANNED SERVICES TO EACH GROUP

I. POOR

Disadvantaged

School Dropouts (Appendix IX-A)

Number in target group - 4,509

Number to be served - 3,775 slots
(includes duplication--individuals who obtain more than one service)

Total Cost of Programs - \$3,946,518

Minority Group Members (Appendix IX-B)

Number in Target Group - 8,697

Number to be Served - 8,640 slots
(includes duplication--individuals who obtain more than one service)

Total Cost of Programs - \$3,208,832

Youth - Under 22 (Appendix IX-C)

Number in target group	-	2,847
Number to be served	-	6,864 slots
(includes duplication--individuals who obtain more than one service)		
Total Cost of Programs	-	\$3,123,875

Older Workers - Over 45 (Appendix IX-D)

Number in target group	-	9,661
Number to be served	-	11,134 slots
(includes duplication--individuals who obtain more than one service)		
Total Cost of Programs	-	\$1,215,260

Handicapped (Appendix IX-E)

Number in target group	-	6,080
Number to be served	-	15,025
(includes duplication--individuals who obtain more than one service)		
Total Cost of Programs	-	\$3,233,624

Other Poor (Appendix IX-F)

Number in target group	-	7,187
Number to be served	-	5,750
Total Cost of Programs	-	\$917,200

II. NON-POOR

Near Poverty (Appendix IX-G)

Number in target group	-	20,674
Number to be served	-	11,495
Total Cost of Programs	-	\$535,000

Other Non-Poor (Appendix IX-H)

Number in target group	-	54,644
Number to be served	-	25,405
Total Cost of Programs	-	\$600,000

Types of Services by Target Group

POOR

DISADVANTAGED

School Dropouts

Intake	3,775
Counseling	1,295
Training & Work Experience	2,275
Job Development	1,735
Supportive Service	1,365
Follow-up	929

Minority Group Members

Intake	8,640
Counseling	801
Training & Work Experience	2,790
Job Development	1,850
Supportive Service	1,100
Follow-up	363

Youth - Under 22

Intake	6,864
Counseling	3,638
Training & Work Experience	4,364
Job Development	799
Supportive Service	1,004
Follow-up	1,079

Older Workers - Over 45

Intake	11,134
Counseling	1,249
Training & Work Experience	1,384
Job Development	281
Supportive Service	254
Followup	281

Handicapped

Intake	15,025 (5000 carryover)
Counseling	4,425
Training & Work Experience	4,575
Job Development	3,555
Supportive Service	3,505
Follow-up	3,955

OTHER POOR

Other Poor

Intake	5,750
Counseling	1,000
Training & Work Experience	750
Job Development	600
Supportive Service	570
Follow-up	600

NON-POOR

NEAR POVERTY

Near Poverty

Intake	11,495
Counseling	1,000
Training & Work Experience	495
Job Development	395
Supportive Service	380
Follow-up	395

ALL OTHER NON-POOR

All Other Non-Poor

Intake	25,405
Counseling	10,000
Training & Work Experience	405
Job Development	405
Supportive Service	395
Follow-up	405

*The figures on types of services for each group are estimates based on received input. Duplication between groups (individuals receiving more than one service) make comparisons between groups extremely difficult.
